Northgate Platform Solutions

Enterprise Microsoft Power Platform architecture, governance, and canvas-to-code migration for US businesses.

northgateplatform.com · darwin@northgateplatform.com · (771) 252-5690

Most enterprise Power Platform estates are not badly built. They are built one request at a time, by people who were never given a platform team, until nobody owns the foundation underneath. Northgate rebuilds those estates and leaves behind governance the internal team can actually run.

7 apps	**20s → 1–2s**	**2 mo → 3 wk**	**2,000**
migrated from canvas to code apps in the first year after GA	cold start on a business-critical production app	time to ship a new application	users on the estate under management

SERVICES

Power Platform Assessment — $6,500 fixed

Two to three weeks. Inventory of apps, flows, connectors, and environments. Load times and failure rates measured rather than assumed. Written findings on what is load-bearing, what nobody has opened in a year, and what it would cost to fix. Ends with a recommendation, including when the recommendation is to do nothing.

Canvas to Code Apps Migration — from $9,500 / app

Rebuild business-critical canvas apps as Power Apps code apps in React and TypeScript on the Power Apps SDK. Faster cold starts, real source control, and a normal developer workflow. Priced per application after assessment.

Governance and ALM Foundation — $14,000 fixed

Four to six weeks. Environment strategy, solution packaging, deployment pipelines, DLP policies, Dataverse security roles, capacity and licensing monitoring. Delivered with written standards and a handover session so it survives without us.

Fractional Platform Owner — from $3,500 / month

Ongoing ownership for organisations that need a Power Platform adult in the room but not a full-time hire. Escalation support, release management, design reviews for citizen developers, and quarterly platform audits.

Subcontract and Staff Augmentation — $85 / hour

Corp-to-corp or 1099 through Northgate Platform Solutions LLC, as a subcontractor to staffing firms, Microsoft partners, and primes. W-9 on file, rate all-inclusive, no agency markup layered underneath.

CAPABILITIES

- **Power Apps** — code apps (React, TypeScript, Power Apps SDK), canvas, model-driven
- **Power Automate** — cloud flows, multi-level approvals, custom connectors
- **Dataverse** — schema and relationship design, security roles, sharing models, business rules
- **Administration** — Power Platform Admin Center, environment lifecycle, DLP policies, capacity and licensing, PowerShell and PAC CLI
- **ALM** — solution packaging, environment variables, connection references, managed deployments
- **Integration** — Microsoft Graph, REST APIs, SQL Server, SharePoint Online, Exchange Online, Entra ID
- **Reporting** — Power BI semantic models, DAX, row-level security, reconciled source data
- **Copilot Studio** — agents grounded on Dataverse, SharePoint, and Graph

SECTOR EXPERIENCE

- **Legal** — platform owner for a 2,000-user AmLaw 100 firm: approvals, HR lifecycle, billing analytics, data-retention compliance
- **Federal advisory** — Power Platform and Power BI delivery on federal programs at a Big Four firm
- **Engineering and infrastructure** — led a three-developer team delivering for public and private sector clients, 20 to 2,000+ users

COMPANY

Legal name	Northgate Platform Solutions LLC
